TOGETHER

Deco  Build

# Deco Build

**A collection of beautiful decorative coloured concrete for internal and external flooring.**

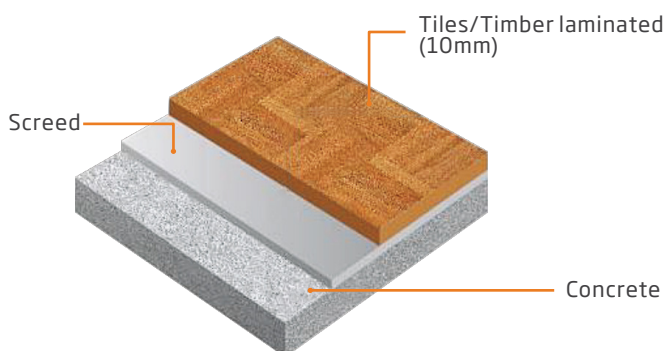

With DecoBuild, you can be assured that your floor will be free from broken tiles, cracks, bulging and fading colour problems.

## Why Choose DecoBuild

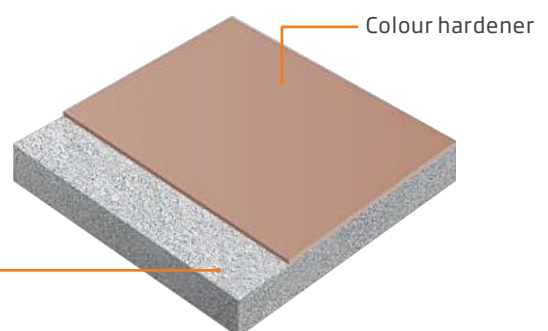

- ✓ **FREEDOM OF DESIGN**  
Offer varieties of design, textures and vibrant colours to meet various design needs
- ✓ **DURABLE**  
2-in-1 structural and finishing floor product with UV protection
- ✓ **PEACE IN MIND**  
High quality product with professional workmanship

## Normal floor finishes

### Tiles or Timber Laminate Flooring

- A finishing layer and its durability depends on underlay, tile adhesive and workmanship
- Incorrect mixing ratio of screed or insufficient adhesive can lead to bulging, wobbling and cracks

### Concrete Imprint

- A thin coating of colour on the surface of concrete, colour will fade over time

# Deco Build LINE

## About YTL Cement

YTL Cement is an innovative leader in construction material and solutions. Initially established in Malaysia to support the local construction industry, YTL Cement is now a leading presence in the Asian region with over 60 years of experience in the industry and operations in 5 countries and counting. With our passion for building better deeply rooted in our beginnings as a construction company, we're committed today to offer world-class quality products and end-to-end solutions to the market's needs.

Some of the key products and services provided include cement, ready-mix concrete and aggregates, used in various projects ranging from small, local projects, to the biggest and most technical and architecturally-challenging infrastructures. As urbanization increasingly impacts our planet, we provide innovative products and building solutions with a clear commitment to sustainability so that we may build nations together.

## About Buildcon Concrete

Buildcon Concrete is the largest Ready-Mix Concrete player in Malaysia with a network of 70 batching plants and a fleet of 1000 mixer trucks. An integral part of YTL Cement Group, Buildcon Concrete has been supplying concrete to Malaysia for over 60 years.

A major contributor to nation building projects in the region, Buildcon Concrete completed its maiden project in Singapore in 2007 with the supply of 100% concrete used to build Resorts World Sentosa Integrated Resort. In 2017, it set a world record for its sole supply of the largest continuous pour for The Exchange 106 tower in Kuala Lumpur.

Buildcon Concrete is the preferred supplier for technically sophisticated and large-scale projects with challenging requirements. With a dedicated team of engineers and construction specialists, Buildcon Concrete is committed to cater to various types of construction needs such as pervious concrete, decorative concrete, ultra-high-performance concrete, and self-compacting concrete (SCC).

**Disclaimer:** The samples shown in this kit only provide an approximate estimate of the result that can be achieved and should only be used as a guideline for product selection. The samples were developed in controlled environment using regional materials that may vary from one location to the next. The finished product can be affected by many factors, including but not limited to: the size, colour and distribution of the aggregates, finishing technique, jobsite conditions, curing methods, and the use of sealer.
